

The Foundation of Inspiring Design

Drawing from nature

Today our offerings extend far beyond the sturdy, austere concrete basement blocks that defined Anchor a century ago. We produce a wide range of concrete products that still include structural block, but now mainly architectural masonry and veneers, pavers, retaining and freestanding wall systems, and other products designed to add color, texture and versatility to businesses, homes and public spaces.

With an emphasis on quality and innovation, we take inspiration from an array of natural materials – chosen for their durability as well as their aesthetic appeal. More than 7,000 color, shape and texture combinations allow creativity and ease of installation in masonry and landscape projects. We pay careful attention to new and ongoing industry demands, meeting the desire for green building supplies with concrete products – sustainable, natural materials.

Engineered to last

For a century, Anchor has led the industry with innovative, inspiring solutions. That spirit of creative thinking defines our company from new product design to behind-the-scenes testing and engineering.

A COLLABORATIVE APPROACH

Our research and development, operations, sales and marketing teams continue to strive for excellence, working together to drive industry development. This team of building and landscape industry experts ensures that we deliver exceptional products and services. Backed by the patents of Anchor Wall Systems, our exceptional engineering and solid construction are unmatched in the industry.

ANCHOR MOLD & TOOL COMPANY

In-house expertise in mold and tool development, maintenance, production and design services helps us to have a turnkey approach from concept to production.

PRODUCTION SERVICES

We offer products with select finishing touches including burnishing, cutting, face mix and tumbling to bring you additional products for a beautiful, distinctive look. Our production facility has the newest equipment to produce the best in the industry.

IN-HOUSE TESTING LAB

Our testing laboratory continually examines our products to ensure they meet or exceed industry guidelines, including freeze-thaw stability tests, and other ASTM standards in addition to ours. It also provides research and development resources as well as quality control services.

Nothing excites our team more than seeing our products blossom into a beautiful building, wall or landscape element. We relish the creativity and skill of our customers, and we strive to offer support for every phase of a project.

Inspiration and support

RESOURCES

From masonry and construction professionals to do-it-yourself homeowners, our customers know Anchor Block Company means not just exceptional products but also outstanding support. We have several on-staff resources to guide you through your projects.

IDEATION

Our knowledgeable salespeople work with architects, engineers, contractors and specifiers to help select suitable materials. When needed, our salespeople also enlist the help of other in-house experts, including our engineers, landscaping contractors and designers.

BRANDED PRODUCTS

Anchor branded products are known in the industry and have become the standard for reliable, innovative and beautiful.

INSTALLATION

We offer detailed installation instructions and on-site support, as well as in-depth field training.

CUSTOMER SERVICE

An unwavering commitment to our customers has guided Anchor for a century – and remains as strong as ever. We stand ready to serve our customers at 1-800-440-8657 or with helpful online resources at www.anchorblock.com.

Since 1909

Since 1909, Anchor Block Company has supplied the building and landscape industry with high-quality, expertly crafted concrete materials. As our company has grown – from the birth of a small Minneapolis manufacturer to the merger of three successful businesses – so have our product lines and our reach. Now one solid company, Anchor offers an extensive selection of masonry and landscaping materials throughout the Midwest.

We've established a reputation for innovation and creativity, as evidenced by our invention of a pinless, mortarless retaining wall system which our sister company, Anchor Wall Systems, now licenses worldwide. Established in 1989, Anchor Wall Systems works with manufacturer licensees in more than 20 countries, helping drive our culture of inspired, inventive thinking. Anchor Wall Systems holds 90 U.S. patents and numerous international patents.

An Equal Employment Opportunity employer and member of many industry associations, we're proud of our 100-year-history and our ongoing dedication to producing cutting-edge, attractive building and landscape products.
